PRE-VASECTOMY INSTRUCTIONS

On the day of your vasectomy, you should shower and wear something comfortable and loose. Bring scrotal support, such as an athletic supporter or tight briefs to put on after the procedure. If you are taking blood thinners or aspirin please discontinue three days prior to procedure.

POST-VASECTOMY INSTRUCTIONS

You will be given two prescriptions. One is an antibiotic, and you must take all of this medicine. The other is for pain, and it is to be taken as needed.

You will be given a specimen container. Please bring a semen specimen in four weeks or after 10-15 ejaculations for the doctor to check. This is important and an appointment is not necessary. Until then, stay on your present form of birth control. Very rarely, the severed ends of the vas may grow back together. To ensure that this has not happened, you must bring another semen sample back in four months.

You may find an ice pack to be helpful in relieving discomfort. Gradually advance your physical activity over the next two weeks as tolerated. A small amount of swelling and bruising is to be expected, however, please feel free to call our office if you have any questions or concerns.

DEPOSIT

There is a $50.00 deposit required for all vasectomy procedures one week prior to appointment. The appointment will be cancelled without further notice if the deposit is not received. This can be done over the phone by credit card or check by mail. After the deposit is received, a 48-hour advance notice is required in order to receive a refund if you must cancel the vasectomy.
